

Safety Car User Manual

This user manual explains all the functionality of our Safety Car insurance application and how to use it. Safety Car website gives its users the opportunity to create insurance offers, based on input criteria (more about the criteria below) and send requests for approval of offer (request policy). Users can also browse through their history of requests.

PUBLIC PART

Navigation Menu

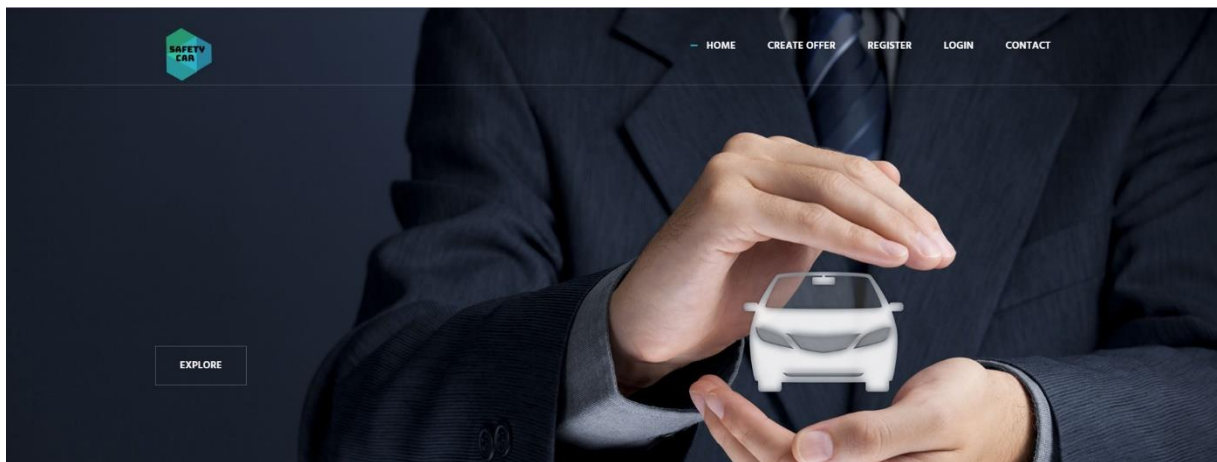

The navigation menu is always visible on the top of our website.

While you are not logged in it has the following buttons are displayed:

- SafetyCar logo - redirects to the homepage
- Home - redirects to the homepage
- Create Offer – redirects to create offer page
- Login - redirects to login page
- Register - redirects to register page
- Contact – redirects to contact page

Explore button below the menu navigates to Contact page.

Home Page

This is the first page you will see when you open the website and one of the five pages that can be accessed by someone who is not logged in. Guests can create offer to see how much it would cost to insure their or someone else's car, they can decide to contact us with any questions, using our contact page. Login option is also there, for those already registered and last but not least, guests can decide to register to the website to access the options we have provided for our registered users.

Create Offer

This is the page that you will see after you click on the "Create Offer" and is one of the four pages that can be accessed by someone who is not logged in.

This page displays several criteria, based on them cost of insurance will be later determined. All fields are required. From drop-down "Select Car Brand" a car brand should be selected among different brands. From drop-down "Select Car Model" a Model should be selected among different models, relevant to the Brand already picked. In "Cubic Capacity" this information for the car should be filled. Negative or Zero value cannot be filled for Cubic Capacity. On the "Registration Date", the exact date of registration should be filled. The constraint here is date must be in the past or the present. In the field "Driver Age", the age of the driver should be entered. The minimum driver age is the one considered in Bulgaria – 18. "Accidents in previous year" requires to be clicked if a driver has suffered an accident during the last 12 months.

Clicking on "Create Offer" will generate a Total Premium offer for the car and a "GUID" code which must be copied somewhere for later if one decides to continue registration or login to the application.

Registration Page

This page is accessed through the Navigation menu on the top of the website when you are not logged in and is one of the five pages that can be accessed by someone who is not logged in.

It is used to create a new user. After you input all the details - Email (used as Username), Password into the fields you will be able to register. Then you will receive a mail from the “Safety Car” to verify that the mail registered belongs to you and after clicking on the verification link in your mail, you will be redirected to a page, where the registration will be confirmed and a redirection to the login page is provided.

Keep in mind that in order to register successfully you need to register a unique mail and a password, following the following requirements: At least one digit, (at least) one Capital letter and length between 6 and 16 symbols.

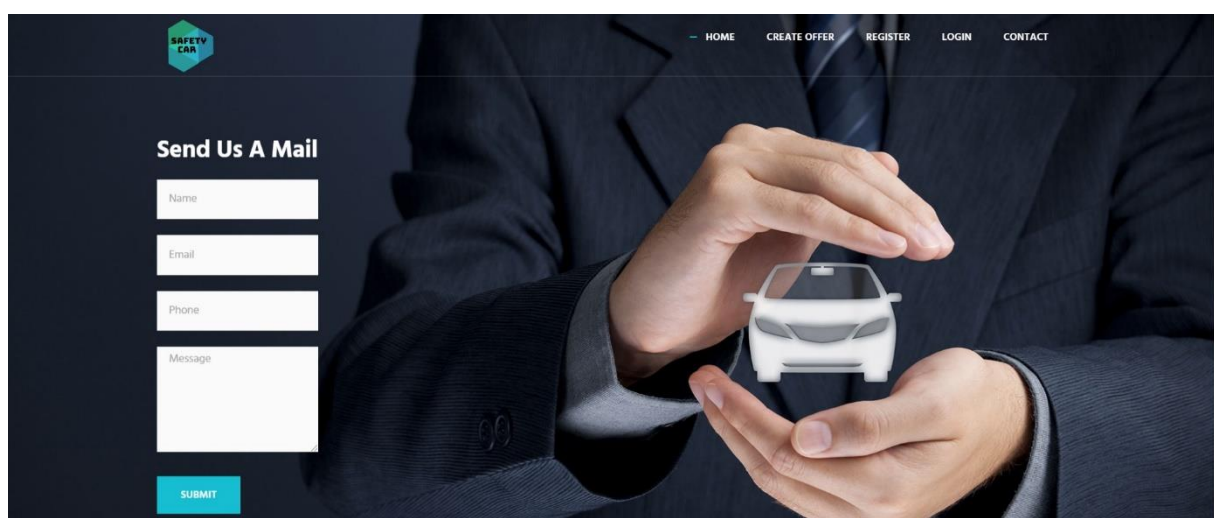

Login Page

This page is accessed through the Navigation menu on the top of the website when you are not logged in and is one of the five pages that can be accessed by someone who is not logged in.

It is used to log a registered user in. Both the email and password have to match an existing user's details in order to login. After you input the correct data and click the login button you will be redirected to the home of page of the private part of the application and will have access to all the functionality that is available only for logged users.

Contact Page

This page is accessed through the Navigation menu on the top of the website when you are a guest. It is a page that gives access to ask any question, regarding the app and its functionalities and answer will be received in 24 hours.

Private Part:

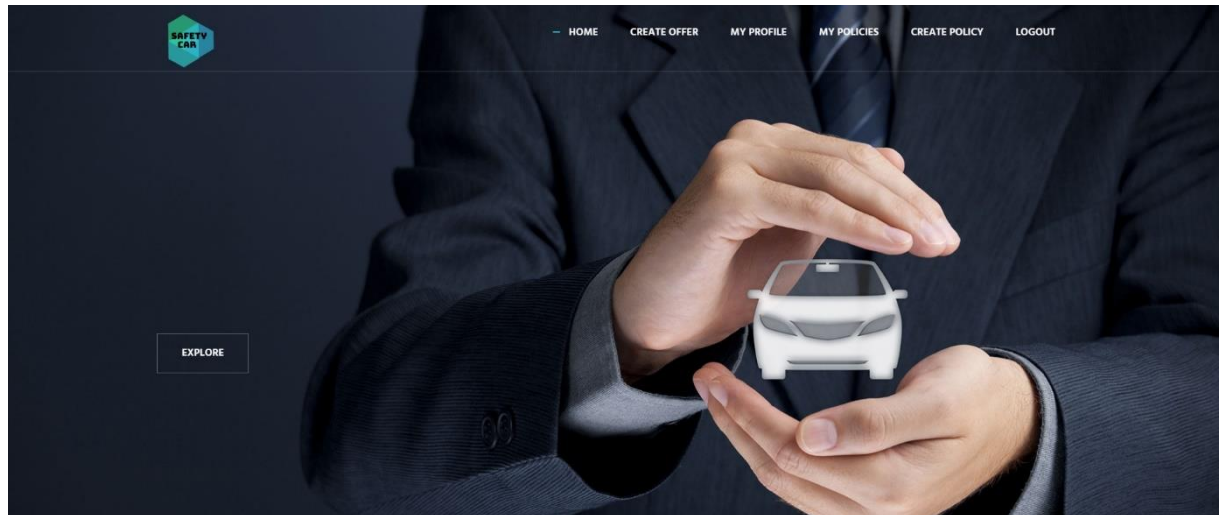

While you are logged in it has the following buttons are displayed:

- SafetyCar logo - redirects to the homepage
- Home - redirects to the homepage
- Create Offer – redirects to create offer page
- My Profile – redirects to user's profile page
- My Policies – redirects to user's policies page
- Create Policy – redirects to create policy page
- Logout- logs the user out and redirects to the homepage.

Explore button bellow the menu navigates to Contact page.

More information about the pages can be found below.

Home Page

This is the first page you will see when you open the website and one of the six pages that can be accessed by someone who has logged in. Users can create offer to see how much it would cost to insure their or someone else's car. Users can access to their personal profile, where their personal info is stored. They have access to "Edit Page" where they are able to change their personal data. In "My policies" users can browse through their requests' history and to filtrate and sort on certain criteria. "Create Policy" gives the opportunity to place policy request for a personal or someone else's vehicle. "Logout" logs user out of the system and redirects to Public Home Page.

This is the page that you will see after you click on the "My Profile" and is one of the six pages that can be accessed by someone who has logged in. In this section user should enter all of the required information left until placing a request for insurance. All fields are required. In the "Offer Code" the GUID code should be pasted in order the offer and the policy in creation to be matched and verified that are two parts of one document.

"Effective date of policy" should be in the future. First, middle and last names should be between 3 and 25 symbols. Birth date have to be in the past and before August 2001 in order the user to be at least 18 years old. Email address, Phone number, Postal Address and Number of the vehicle have to correct and valid in order policy to be successful. Image of the vehicle registration plate is also required. Image should clearly states the Number of the vehicle, already declared. When clicking on "Create Policy" button, the policy will be placed for approval and can be found in section "My Policies".
